

10 June 2019

NEW CLINICAL PATHWAYS SITE - COMMUNITY HEALTHPATHWAYS

The Collaborative Central Pathways (CCP) project team is pleased to announce the launch of a new collaborative Whanganui & MidCentral Community HealthPathways site, which will be available from July 2019.

HealthPathways is an online portal used by health professionals to help make assessment, management and specialist referral decisions for over 550 conditions. HealthPathways is currently used in 17 of the 20 DHB districts in New Zealand, in all Australian states and is also being rolled out in the United Kingdom.

The previous Map of Medicine pathways, currently hosted on the CarePathways site, will not be available after 30 June 2019.

The Whanganui & MidCentral Community HealthPathways site will provide health professionals with access to more than 600 pathways, founded on evidence-based best practice across New Zealand and overseas, and backed by a very strong clinical and peer review process.

Initially all pathways will be standard national pathways without localisation to our districts. Pathways will be localised progressively across the two districts. Localising pathways will range from adding local contact details to changing advice within the pathway to fit with local service arrangements.

The Collaborative Central Pathways project is an initiative of MidCentral DHB, Central PHO and the Whanganui Alliance Leadership Team (Whanganui DHB, National Hauora Coalition and Whanganui Regional Health Network). The HealthPathways Programme Lead will be based at Central PHO and will work with an operational team of Clinical Editors and Administrators from both districts.
